We are seeking a dynamic and experienced General Manager – Projects to lead and drive the operational and project management functions of our organization. This pivotal role offers an excellent opportunity for a professional who thrives in a fast-paced environment and has a proven track record of delivering results in a manufacturing (process industry)

Key Accountabilities / Responsibilities:

- Demonstrate strong understanding and expertise in the process industry.
- Develop and implement strategic plans to achieve organizational goals.
- Provide leadership to ensure the successful execution of operational and project objectives.
- Oversee daily operations, ensuring efficiency, productivity, and cost-effectiveness.
- Design and implement policies and procedures to optimize operational performance.
- Monitor and evaluate operational metrics, identifying areas for improvement.
- Lead the planning, execution, and delivery of multiple projects simultaneously.
- Establish project goals, timelines, budgets, and resource allocation strategies.
- Identify and mitigate risks to ensure project success.
- Build, mentor, and manage high-performing teams across departments.
- Foster a culture of accountability, collaboration, and continuous learning.
- Conduct performance evaluations and provide constructive feedback.
- Maintain strong relationships with internal and external stakeholders, including clients, vendors, and regulatory authorities.
- Act as a primary point of contact for project-related inquiries and updates.
- Prepare and manage operational and project budgets.
- Ensure financial goals are met while maintaining quality standards.
- Analyze financial reports and recommend cost-saving initiatives.
- Ensure compliance with all relevant laws, regulations, and industry standards.
- Identify operational risks and develop contingency plans to address them.
- Stay updated on industry trends and innovations to drive business growth.
- Implement best practices and innovative solutions to enhance operational efficiency.

Required Skills:

- Very good understanding of manufacturing industry.
- Excellent problem-solving, communication, and leadership skills.
- High level of management and operations acumen.
- Current knowledge of engineering and production.
- Professional capacity to train and lead the operations team.
- Demonstrate leadership qualities.
- Excellent communication, interpersonal and presentations skills.
